## MAXIMIZE YOUR RETURN ON INVESTMENT FROM YOUR EXISTING PAINT BOOTH

**10 THIN ENDOTHERMIC PANELS:**  
attached to the walls of an existing paint booth.  
**TECHNOLOGY:** endothermic heat waves.

**CONSTRUCTION:**

- Aluminum framing for high rigidity
- Beveled corners with locking joints
- The heating element is made of a white powder coated plate and a counter-panel
- Thermal insulator made of mineral wool,
- Total weight of panel is 16 kg./35.2 lbs

**Installation to the booth wall:**

- 4 panels on the right side of the car
- 4 panels on the left side of the car
- 2 panels in front of the car

**THE SYSTEM WILL PAY FOR ITSELF IN ONE YEAR**
